

Vodafone One Net

See what it could do for your business

Ideal for businesses with more than 10 employees
Vodafone One Net **seamlessly integrates landlines and mobiles**, so your phones work together. It gives you predictable costs with no call divert charges and one single calling plan.

Landlines and mobiles are seamlessly integrated

With Vodafone One Net, your mobiles become Virtual landlines. It doesn't matter which number your customers dial, your employees can answer their calls on their desk phones or mobiles. So they're in complete control of how and where they answer calls.

One phone company, one voicemail, one bill

With Vodafone One Net, everything becomes more streamlined and cost-effective. We provide all your desk phones and mobiles, with a single consolidated bill for all of them – so it's much simpler for you to manage. Each employee has one voicemail, so they can manage their deskphone and mobile

messages with ease. And if they ever need support, there's only one number they need to call.

Predictable costs, one single calling plan

As your business develops, your workforce and premises may grow and change too. Vodafone One Net is totally adaptable, allowing you to add new users and features quickly and easily, whenever your business needs it.

Do business further afield

Vodafone One Net gives you landline numbers that are local to the areas of the country you want to do business in. Which means you can do business further afield, and your customers can always 'call local'.

“Vodafone One Net has transformed our business – we're more productive, can work more flexibly and are saving money. It has been crucial to the evolution of our organisation.”

Jackie Fisher,
Director, Power Office Services

Hunt Groups, made mobile

A range of features including Hunt groups if one person in a team can't answer an incoming call, Vodafone One Net searches desk phones and mobiles and diverts to a person who's free to answer.

One Voicemail, made mobile

Vodafone One Net merges your desk phone and mobile voicemails into one. So you can access it from either phone, saving you time and hassle.

Getting started in three simple steps

1. Consultation – we will meet with you to discuss your business requirements and together we'll devise a migration plan that's in line with your business needs. We will also appoint a Project Manager to manage the delivery process on your behalf.

2. Set up and migration – one of our trained engineers will visit your site to set up, configure and test your Vodafone One Net phones and ensure you know how to use them. Our aim is to minimise downtime so individual users will only experience short outages while cabling is rerouted.

3. In-life management – you'll have the support of our dedicated, UK-based Vodafone One Net service team who are available 24/7 for any high-priority issues.

Call **08080 044 499** to arrange your One Net consultation or visit www.vodafone.com/one-net

Benefits

Seamless integration of landlines and mobiles

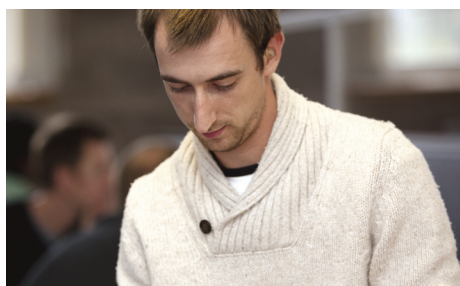

One phone company, one bill, **total simplicity**

Increase your productivity

Predictable costs, one single calling plan

Support your customers locally with 01/02 landline numbers

Never miss a call, wherever you're working

Charles Weir,
Managing Director, Penrillian

“It is now much easier for whoever takes a call to just say that they will transfer them. Previously they had to have an encyclopaedic knowledge of where everybody was at that moment but now they can just put a call through to the appropriate mobile.”

Penrillian develops advanced applications for leading players in the mobile phone industry.

Adam Miller,
Business Support Co-ordinator,
Phoenix4Training

“With Vodafone One Net helping us to respond to customers’ needs rapidly, wherever we are, it makes our small firm look even more efficient and professional.”

Based in Crawley, West Sussex, Phoenix4Training provides apprenticeships, e-testing, National Vocational Qualifications (NVQs) and training courses.

Chris Goss,
Director, CCBS

“Now I can take my time getting ready in the mornings as my office calls come through on my mobile too. Answering that early morning call and securing that £20k contract made it all worthwhile.”

Based in Berkshire, UK, CCBS provides conveyor belt services to businesses.

Stephen Priestnall,
Founder, oomph

“We’re now free to continue growing fast without the restrictions of having to invest in, manage and upgrade an in-house communications system. And Vodafone One Net will keep pace as oomph grows.”

Founded in 2005 and based in Cirencester, UK, oomph is a multi-channel advertising agency.
